i MiEV Mitsubishi Electric Car

Plug into the future today

i-MiEV is the clever pure electric car from Mitsubishi. Not just a concept, the i-MiEV is available to test drive and own now. It even qualifies for the Government £5,000 Plug-In-Car-Grant. It can be charged overnight from a 13A household socket and could cost as little as £135 to drive 12,000 miles, if you use Economy 7. No road tax, no BIK company car tax, no congestion charge, free parking in many places and no tailpipe emissions. **We call this Intelligent Motion.**

INTELLIGENT *MOTION*

i-MiEV will fully charge in 7 hours at a typical cost of £2.09 (£1.05 using Economy 7). Fully charged i-MiEV will drive up to 93 miles.
